Responder a: composer/composer <reply+ASSGTU5SA2EM4KSEKRAF27N6MU2ADEVBNHHDCXPCIY@reply.github.com>
Para: composer/composer <composer@noreply.github.com>
Cc: Subscribed <subscribed@noreply.github.com>

I am researching to make the phpMyAdmin builds reproducible.

As you can see the composer diffs are quite small in size.
Any idea on how I can get all this to not differ ?

```
diff composer-workstation/autoload_real.php composer-snap-srv/autoload_real.php
